

CopyNotify! (Version 1.4)

Client Installation Guide

Client INSTALLATION GUIDE

CopyNotify! (Version 1.4)

Client Installation Guide

- ✓ Components of CopyNotify!

IMPORTANT READ FIRST

This CopyNotify! Server Component should be installed FIRST on a computer on the network after which, the CopyNotify! Clients can be installed on the rest of the machines.

➡ *CopyNotify! Client Component:*

This component is installed on the computers on the network that need to be monitored for possible data theft activity.

Supported Operating Systems

Win XP (SP2) , Win Vista, Win 7.0, Win 8.x, Win 10, Win 2003, Win 2008

Security Tip :

If the users have all administrative privileges on their computers then attempts can be made by the user to kill or switch off the CopyNotify! Client component thus rendering the monitoring of possible anti-data theft activity in-effective.

Hence in order to counter the same, it is strongly advised to remove administrative privileges for users on computers that are being monitored

CopyNotify! (Version 1.4)

Client Installation Guide

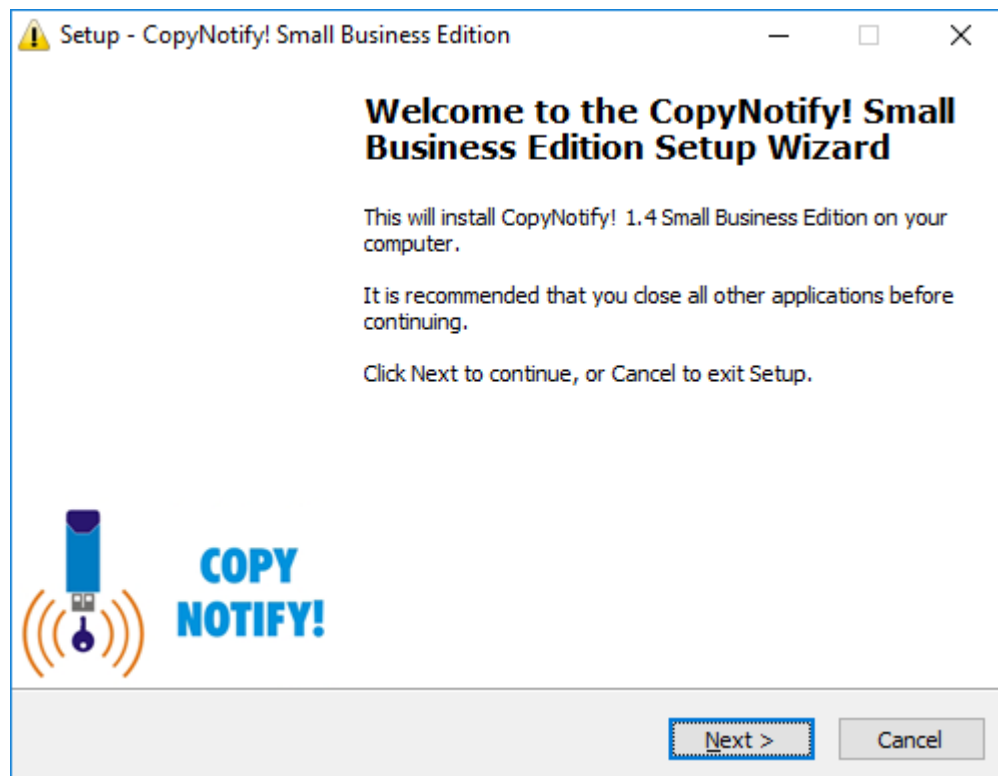

✓ CopyNotify! Client Installation

Important Installation Tip : Before Installing the CopyNotify! Client, please ensure that if a firewall is installed, the following ports need to be opened.

- Port 40007 for UDP
- Port 40005 for UDP
- Port 5555 for UDP
- Port 5553 for TCP.

These ports are required for both the running of CopyNotify! Server & Client.
